

Project objectives

O1 · Deviation detection

FS + storage-group standards (any OS)

O2 · Storage optimization

useless / obsolete / misplaced

O3 · Reliability + scalability

prevent full filesystems

O4 · Operational efficiency

standardization, forecasting

O5 · Risk reduction

system partitions, compliance

Detection branches (rule-based)

O1_check_standards

compare to golden image

O2_storage_optimization

content_aggregates, mtime, data_on_system

O3_reliability_scalability

used_pct, inodes, days_to_full

O4_operational_efficiency

layout drift, series quality

O5_risk_reduction

policies, world_writable, mount_options

aggregate_dedup

→ recommendations
